

Get Creative!

A fast, fun and effective one day event to get the juices flowing for you and your team

Creative thinking is sometimes thought of as the preserve of 'Creatives' media types - who seem to find it easy to have ten good ideas before breakfast.

Yet creative thinking vital in every aspect of life and industry.

Everyone is creative, and everyone can benefit from a little time out to develop their creative side.

This Creative Thinking Event can help to solve problems, find solutions, bond teams and expand horizons.

The course is well tried and tested and draws on several serious concepts of creative thinking in an enjoyable and non threatening environment.
